Porkyplay

Porkyplay distinguishes itself from other toys as it is made of biodegradable material with an antibacterial function, killing 99.9 % of E.coli and MRSA bacteria. Other specific characteristics are the unique design and various scents. There is a choice of five scents so that the pig has the idea of having a new toy when a different scent is used. While playing with the toy, the scent intensifies and the pigs play longer, reducing stress and tail biting.

- Reducing stress and tail biting
- Antibacterial function, killing 99.9 % of E.coli and MRSA bacteria
- Unique design
- Various scents
- Suitable for all pigs over the age of 4 weeks
